

Innovation & Entrepreneurship Hub for Educated Rural Youth (SURE Trust – IERY)

SAP ABAP Solutions for Healthcare Management System

The domain of the Project:

Enterprise Resource Planning (ERP) – SAP ABAP

Course Name:

SAP ABAP

Team Mentor:

Name: Santoshkumar Ramlakhan Pal

Email: santoshpal393@gmail.com

Designation: SAP ABAP Associate Consultant at Infosys Limited

Team Members:

Mr. Yashvanth H S

Period of the project:

November 2025 to April 2026

Declaration

The project titled “**SAP ABAP Solutions for Healthcare Management system**” has been mentored by “**Santoshkumar Ramlakhan Pal**”, organised by SURE Trust, from November 2025 to April 2026, for the benefit of the educated unemployed rural youth for gaining hands-on experience in working on industry relevant projects that would take them closer to the prospective employer. I declare that to the best of my knowledge the members of the team mentioned below, have worked on it successfully and enhanced their practical knowledge in the domain.

Team Members:

Mr. Yashvanth H S

Mentor Name: Santoshkumar Ramlakhan Pal

Designation: SAP ABAP Associate Consultant at Infosys Limited

Executive Summary

This project focuses on the implementation of **SAP ABAP** in the healthcare sector to improve hospital operations such as patient management, billing, inventory tracking, and reporting.

The project demonstrates how customized ABAP reports and automation can enhance efficiency, reduce manual errors, and improve real-time decision-making in hospitals.

Key outcomes include

- Patient record management report
- Billing and payment tracking system
- Medicine inventory report
- Automated report generation

Introduction

Background and Context

The healthcare industry deals with large volumes of patient data, billing transactions, and medical inventory. Managing this manually leads to inefficiencies.

ERP systems like **SAP ERP** help streamline these operations.

SAP ABAP is used to customize:

- Patient billing systems
- Inventory of medicines
- Hospital reporting

Problem Statement

Hospital often face:

- Manual patient record handling
- Errors in billing
- Poor inventory tracking
- Lack of real-time reports

Scope

This project focuses on:

- Developing ABAP reports for hospital operations
- Automating billing and inventory tracking
- Improving data visibility

Limitations

- Uses simulated SAP data
- Limited to reporting and basic automation

Innovation Component

- ALV reports for patient and billing data (Smartforms)
- Automated background jobs (Transaction report)
- Excel download functionality(ALV report)

SmartForm Implementaion

Project Objectives

Project Objectives

- Develop ABAP reports for healthcare management
- Patient invoice generation
- Improve medicine inventory tracking
- Enable real-time reporting

Expected Outcomes

- Functional ABAP reports
- Reduced manual errors
- Faster report generation

Methodology and Results

Methods / Technology Used

- SAP ABAP Programming
- ALV (ABAP List Viewer)
- Modular Programming
- Smartforms

Tools / Software Used

- SAP GUI
- SE38 (ABAP Editor)
- SE11 (Data Dictionary)
- SE80 (Object Navigator)
- Smartforms

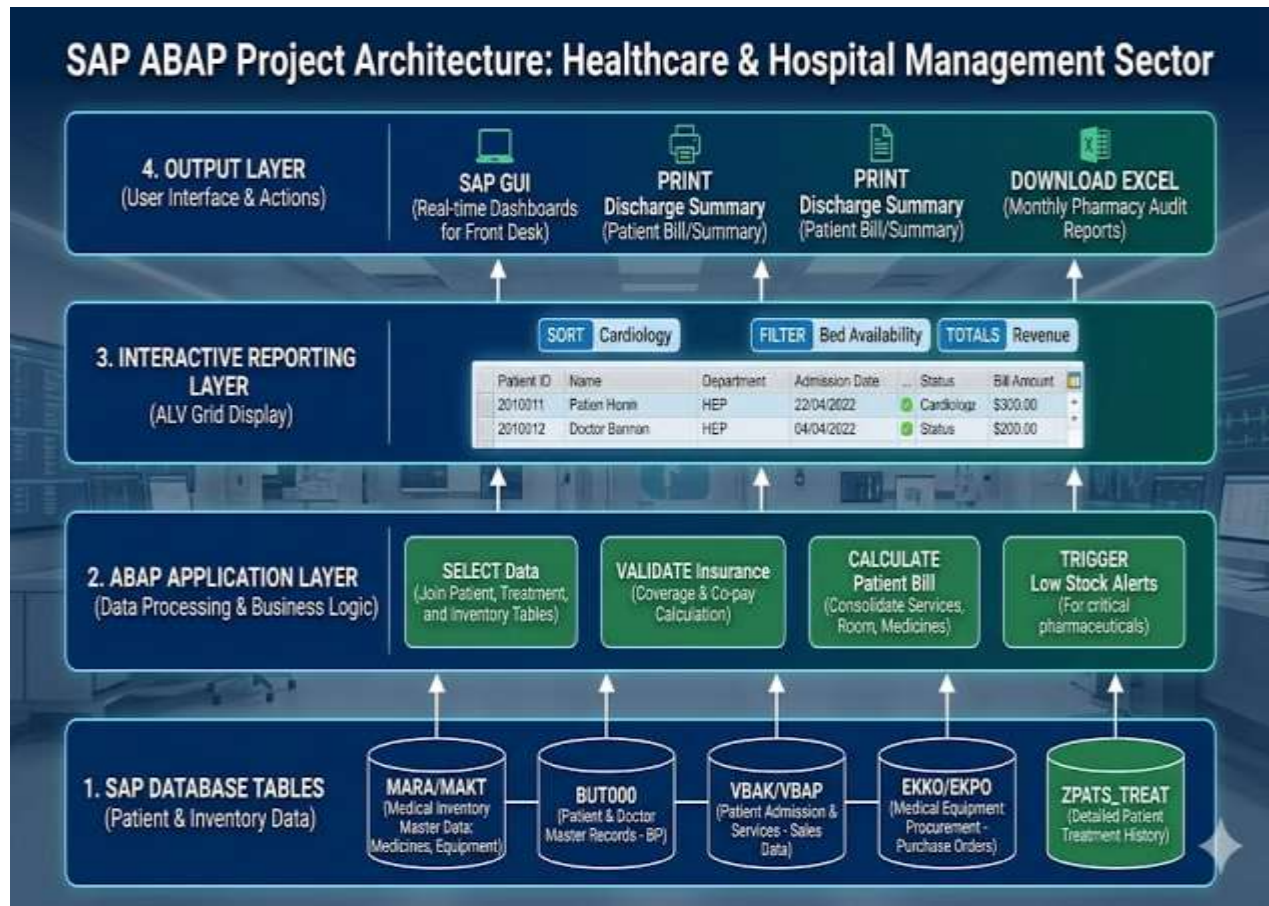

Data Collection Approach

SAP standard tables like:

- MARA (Material Master)
- EKKO (Purchase Orders)
- VBAK/VBRP (Billing Data)
- KNA1 (Customer Master)

Project Architecture

1. Data Extraction from SAP Tables
2. Data Processing using ABAP Logic
3. Display using ALV Grid
4. Created smartforms
5. Export functionality to Excel

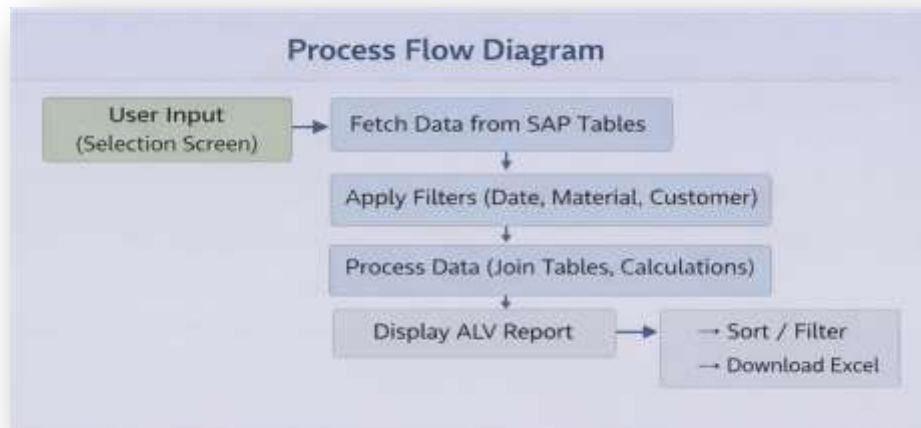

Key Features Developed

- 🏠 Patient Details Report
- 🧪 Medicine Inventory Report
- 💰 Billing Report
- 📊 Monthly Revenue Report
- 📄 Excel Download Button

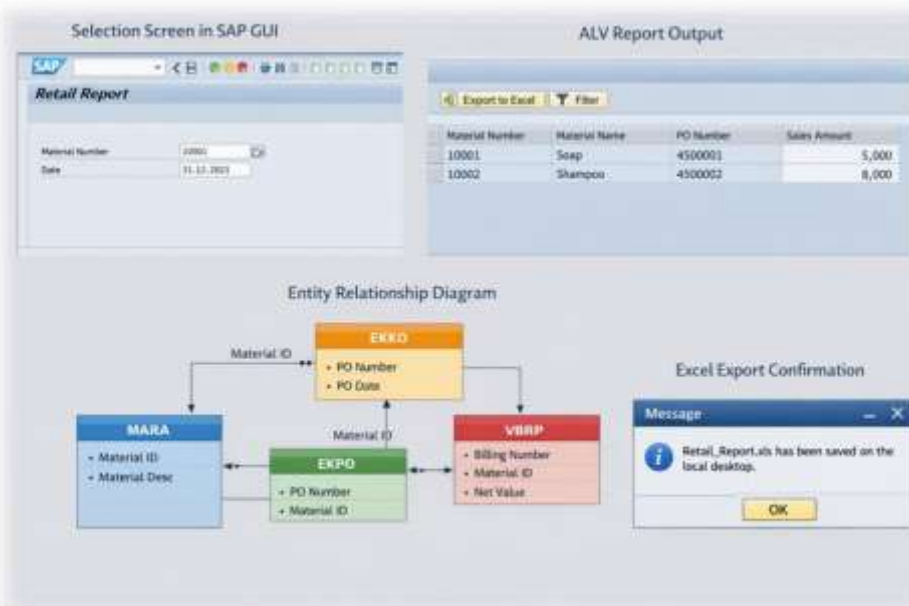

Process Flow

Results

- Faster report generation
- Improved billing accuracy
- Better inventory management
- Reduced manual workload

Project Overview

Innovation & Entrepreneurship Hub for Educated Rural Youth (SURE Trust – IERY)

Social / Industry Relevance of the Project

This project is highly relevant to:

This project is useful for:

- Hospitals
- Clinics
- Pharmaceutical companies

Impact

- Improves patient data management
- Reduces billing errors
- Supports digital healthcare transformation

Innovation & Entrepreneurship Hub for Educated Rural Youth (SURE Trust – IERY)

Learning and Reflection

Technical Learnings

- SAP ABAP programming concepts
- ALV report creation
- Working with SAP tables and data
- Smartform creation

Management Learnings

- Project planning and execution
- Problem-solving skills
- Time management

Overall Experience

Working on this project was a highly valuable and enriching experience, both technically and professionally. It provided practical exposure to real-time SAP environments and helped in bridging the gap between theoretical knowledge and industry applications.

Innovation & Entrepreneurship Hub for Educated Rural Youth (SURE Trust – IERY)

Conclusion and Future Scope

Conclusion

The project successfully demonstrates how SAP ABAP can be used in healthcare to automate processes like billing, inventory, and reporting.

Future Scope

- Integration with SAP Fiori for better UI
- Real-time dashboards using SAP Analytics
- Advanced automation using AI/ML
- Deployment in hospitals
